

Future of Industrial Circularity - Open call #3 Corporations - Startup Opportunity

ABOUT

BioeconomyVentures aims to ignite a strategic collaboration between innovators and corporations in the bioeconomy in favour of sustainable development.

The project takes a custom and challenge-driven approach to scouting and selecting innovators, with its third programme domain focusing on "The Future of Industrial Circularity" topics:

- Forestry, Pulp and Paper
- Bioenergy & Biofuels
- Wood & Furniture's, Building materials & constructions
- Bio-based Textiles and wearing apparel
- Food and Feed from side and waste streams
- Waste Processing & Up/Recycling
- Other

HOW

- BioeconomyVentures will select 65+ promising EU innovators.
- With the support of the open innovation experts and the proven process, your company will establish challenges and find innovators to solve them.

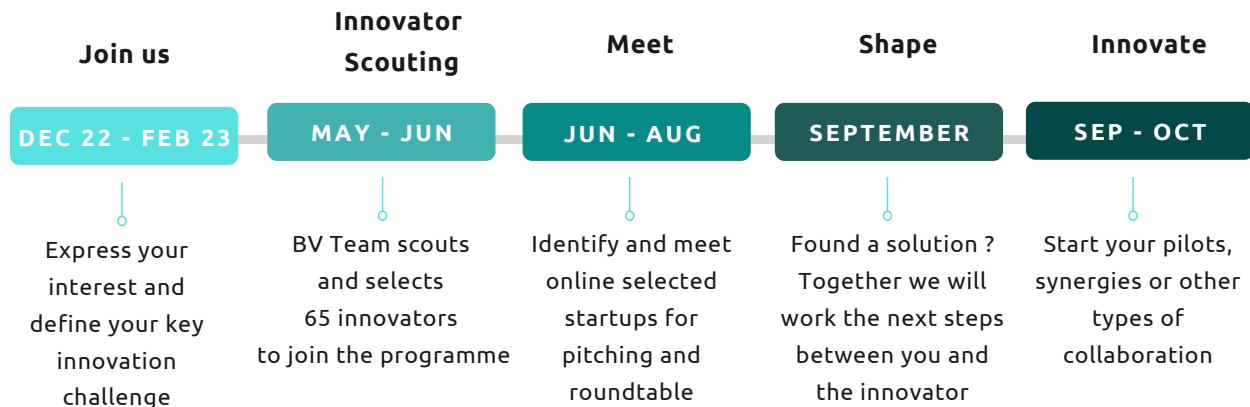

- In a facilitated online meetup and pitching session your company can get familiar with innovators, dig into the details in one-on-one sessions, and identify opportunities to collaborate.
- The collaboration shaping session will follow to create the action plan for your partnership.

BENEFITS FOR CORPORATION

- Explore different types of collaborations, from R&D and open innovation, prototyping, pilot programmes, commercial opportunities, mergers, and acquisitions etc.
- Define your Innovation challenge with our corporate-startup collaboration experts, and have us scouts find the best solutions in Europe
- Access to exclusive physical events that the programme

- Direct access to matchmaking with 65+ leading European bioeconomy innovators in one place, curated and pitching to partner with you,
- An exclusive corporate pitching day, where you will meet selected innovators and identify the best startup partner for you
